

Built for the Next Generation Cat Tier 4 Engine Products

Join SAE-CIS for an evening with Doug Mihelick, commercial manager at Caterpillar's Large Power Systems Division. Doug will be discussing the current Tier 4 interim emissions regulations, how technology is being leveraged to meet these challenging emission goals, and how looming Tier 4 final regulations will further challenge our engineers. Additionally, there will be a Cat engine and emission package cutaways for viewing at the event. Hope to see you there!
